

Intensive degreasing
and cleaning
preparation

For all oiled wood
floors

Thoroughly cleans
stubborn stains

Removes old and
heavily stacked coats

Weak odour

Powerful Cleaner

PRODUCT DESCRIPTION

- BLANCHON POWERFUL CLEANER thoroughly removes the most stubborn stains and dirt from all wood floors coated with oil* (on site or in the factory).
- POWERFUL CLEANER is also a strong degreaser capable of removing a large number of greasy smudges. The product also removes black marks left by footwear.
- It ideally prepares surfaces before applying a new layer of oil: MAINTENANCE OIL or ORIGINAL OIL.
- POWERFUL CLEANER is strongly diluted with water before application, and its fragrance is almost undetectable.

SURFACE PREPARATION

- The product is meant for oiled wood floors* (oiled on site or in the factory), which must be clean, dry and free of dust.

*Carry out a test on an inconspicuous area before treating the whole surface.

DIRECTIONS FOR USE

- Surfaces covered with BLANCHON ORIGINAL WOOD™ ENVIRONMENT or any other water-based oil: dilute 100 ml of POWERFUL CLEANER (2 cups) in 5 litres of warm water.
- Surfaces covered with HARD WAXOIL, WOOD FLOOR OIL, BLANCHON SOLID'OIL™ or other traditional oil: dilute 200 ml of POWERFUL CLEANER (4 cups) in 5 litres of warm water.
- Apply the solution to the floor using a damp (not wet) microfibre mop or floorcloth. Alternatively, use a buffing machine fitted with red or green abrasive pads.
- Leave it to act for a few minutes.
- Remove traces with a vacuum cleaner or a squeegee, then with a microfibre mop.
- Rinse with warm water using a damp, thoroughly wrung out mop or cloth.
- POWERFUL CLEANER does not lather and can be applied manually or by machine.
- **IMPORTANT: an excessive amount of water must never be used on wood floors; always use tools that are thoroughly wrung out, not soaking wet.**

Cleaning of tools

- Immediately after use, with water.
- Protecting the environment:
 - Carefully remove excess moisture from the equipment after application; dry thoroughly.
 - Rinse using very little water in a container; allow the water to evaporate.
 - The dry residue may then be disposed of normally in a bin.
 - Seal the containers properly after use.
 - Do not discharge the residue into drains.
 - Dispose of empty containers at a waste recycling centre.

DRYING TIMES

- Dust free time: about 15 minutes after rinsing.
- Place suitable protection (felt) under the feet of tables and chairs. If necessary, a quality doormat placed at the entrance to the room will retain dust and gravel. Do not allow water or other liquids to build up on your oiled wood floor (isolate flower pots). Do not move heavy furniture. Remove dust with a vacuum cleaner or broom (do not use impregnated textiles).

COVERAGE

- 1 L of POWERFUL CLEANER = approx. 250 to 500 m².

STORAGE

- Protect from frost (be especially careful when storing in vehicles).

Blanchon

Powerful Cleaner

MAINTENANCE AND UPKEEP

- **Routine cleaning:** wet wiping with a solution of 50 ml of NATURAL SOAP to 5 L of water or with LAGOON®, using a well wrung mop or cloth.
- **Intensive cleaning:** wet wiping with a solution of 100 ml of NATURAL SOAP to 5 L of water for a water-based oil or 200 ml to 5 L of water for a traditional oil. Rinse with water using a thoroughly wrung out mop or cloth.
- **Routine maintenance:** apply UNIVERSAL MAINTENANCE OIL on a clean and dry oiled wood floor using a microfibre mop.
- **Refinishing small areas:** for severely damaged areas (worn down to bare wood, impact marks, scratches, etc.), sand vigorously (with fine sandpaper) and re-impregnate the area with the original oil (apply a thin layer with a clean, soft cotton cloth). DO NOT USE steel wool. For a perfect finish, treat the whole surface as described in 'Routine maintenance' above.
- **Refinishing large areas:** sand the entire surface with a buffing machine fitted with an abrasive mesh (120-150), vacuum it, and then apply a thin coat of the original oil.

SAFETY INSTRUCTIONS

- Use only in well-ventilated areas.
- Wear gloves and goggles.
- In case of contact with the eyes, rinse thoroughly with clear water and consult a doctor.
- Avoid contact of the POWERFUL CLEANER with bleach.
- Keep out of reach of children.
- Do not discharge the residue into drains.

TECHNICAL DATA

USE	POWERFUL CLEANER for oiled wood floors
SURFACTANTS TYPE	Anionic and non-ionic
DENSITY	1.00 (at 20°C, as per NF T 30020)
REGULATORY INFORMATION	Refer to the relevant Safety Data Sheets (available on www.blanchon.com or on www.quickfds.com)
pH CONCENTRATED	12
pH DILUTED	(1 part to 10): 10
FRAGRANCE	Weak odour
STORAGE	Protect from frost (be especially careful when storing in vehicles)
